## TOYOSEAL Processing

### Prevents dirt on reinforcement thread

Hermetical sealing of hose edge face prevents fluid from seeping into reinforcement thread and protects the thread in hose tip portion from dirt.

### Reduces contamination of products

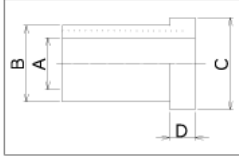

With no fluid seeping into reinforcement thread, products are less susceptible to contamination.

Also, sanitary management in factories and processes is facilitated.

TOYOSEAL is registered with the **FDA**, FDA Drug Master File Type II (number 25486)

Please read the below [precautions](#) before use.

### TOYOSEAL Processing Specifications

	Part Number	Applicable hose part number	Dimensions (mm)			
			A	B	C	D
	TYSL-19	TSI-19	19	28	30	8
	TYSL-25	TSI-25	25.4	35.5	38	10

\*After TOYOSEAL processing, neither TOYOSILICONE dedicated couplings (TOYOCONNECTOR-F, TOYOCONNECTOR) nor hose assemblies can be used.

\*Attach hose clamps in a way that avoids TOYOSEAL processing portion (Thickened portion of the end face).
